

Thanksgiving Contest: "Save The Turkey"

Teams. No captains.

Scenario:

While visiting a poultry farm, we walk by the enclosure where the turkeys are kept. Back in the corner, we see some turkeys gathered together whispering. As we get closer, we realize they are formulating a plan of escape.

We move closer and ask if we can help. One of the turkeys points out a hole in the fence. He tells us that they want to escape through that hole, but the farmer has been fattening them up so they are too big to fit.

The turkeys want us to help them lose enough weight so they can make their escape. (Each turkey needs to lose 25 lbs.)

This is how we are going to save the turkeys:

Each team is going to be assigned a turkey. Team members will report in each week after their weigh-ins. The goal is for each team set their turkey free losing a total of 25 lbs.

TOPS: You will be credited for every loss.

KOPS: If at or under goal, you will be credited with a quarter lb loss weekly. If above goal, you will be credited losses.

Bonus: Each team can earn an extra lb loss if every member of the team reports in by the deadline.
